Experience

Software Engineer, Archon Systems, Jan. 2024 - Oct. 2024

Full-stack development for inventory management web app: React, SQL, C# and Microsoft Azure.

- Built Attachments feature, handling storage of **100,000+ attachments/year**
- Built new features end-to-end, writing RESTful APIs and integrating with third-party services
- Wrote common and extensible React components reused across the codebase, eliminating redundant components and achieving UX consistency

Software Engineer, VerticalScope, May 2020 - Feb. 2023

Full-stack development for **100+M users across 1200+ forums**: SQL, PHP, JS, React, TypeScript and Golang.

- **Reduced build time by 60%** by identifying and pre-building reusable assets, allowing deployment to increase from 2x/month to 2x/week
- **Increased revenue by \$1M** annually by refactoring a critical query which reduced page load times by **50-300ms**
- **Managed a high-velocity pilot product team of 4 engineers**, releasing 7 product experiments over a 2 month period and achieving 5-7% CTRs with low bounce rate
- Designed integration of newly acquired data pipeline into native codebase reaching millions of users
- Built in-forum marketplace **adopted by 10% of users** to introduce buy/sell/trade between users
- Architected new database schema to handle data migration from 500+ legacy forums
- Deployed updates to 1200+ sites using Kubernetes
- Monitored microservice and deployment health in GCP while on-call and off call
- Documented legacy microservice and implemented Honeycomb observability
- Mentored various co-op students, and helped onboard new senior developers onto the team

Embedded Engineer (Test Fixtures), ecobee, Jan. 2019 – Mar. 2020

Developer and liaison of test machines used at the factory to validate 100s of ecobee products daily.

Co-founder, Team Lead, Product Designer, Foodvine, July 2016 – Nov. 2016

Co-founded Foodvine, a web app that facilitates order management between local farmers and restaurants and stores.

Education

Bachelor of Applied Science, Computer Engineering

Queen's University, 2018

Languages & Frameworks: JavaScript (ES6), React, TypeScript, PHP, C#, SQL

Tools: Git, Docker, Kubernetes, Google Cloud Platform (GCP), Microsoft Azure
